

ETL Electro Thermal Link

BSS Product Code 20806643

Application

The ETL Electro Thermal Link is used to detect a rise in temperature caused by a fire. The unit is installed immediately above a potential fire hazard in a position that allows an unrestricted air flow through its ventilated housing. The thermal fuse is designed to melt at 72c and break the power supply to a safety shut off valve and associated equipment. The fuse is not resettable but is easily replaced.

Technical Specification

ETL	Electro Thermal Link
Electrical Rating	5 Amp 230 Volt.
Thermal Fuse	Non resettable fuse breaks at 72c
Enclosure	Pressed steel
Cable Entry	20mm Conduit entry
Dimensions	80mm x 50mm x 25mm
