BOSS™

S-CPB Panic Button

BSS Product Code 20806654

Application

The BOSS S-CPB emergency panic button is generally fitted inside a boiler or plant room and is pressed to break the power supply to a safety shut off valve and associated equipment. The button is normally wired in series with a thermal link. Once operated the button is reset by twisting the button which restores the power and primes the button for further use.

Technical Specification.

S-CPB	Panic Button
Electrical Rating	Normally closed contacts rated 10 Amp 240 Volt Screw terminals accept 1.5mm cable.
Operation	Push to break contacts, twist to reset.
