

# BOSS™ X-PO65

MONOETHYLENE CONCENTRATE

### **Data Sheet**

Image not yet available

## **General Description**

A BuildCert Approved inhibitor plus Monoethylene Glycol anti-freeze. Concentrate formulation for chilled water circuits, including ground source heat pumps.

Code: 16901895

### **Properties**

- Reduces the freezing point of water in proportion to its concentration
- Good corrosion control for most common metals of construction

#### **Benefits**

- Easy to use
- Free from nitrites
- Free from borates

#### **Use Instructions**

Normal Dose Rate: Dose to give desired level of freezing protection. Min dose for full corrosion protection is 30%.

Instructions: 20% MPG (by volume) gives a freezing point of -9°C. 40% MPG (by volume) gives a freezing point of -24°C.

### **Product Compatibility**

Do not mix with other chemicals unless advised by your consultant.

#### **Technical Data**

Composition: A blend of monoethylene glycol

and corrosion inhibitors.

Appearance: Colourless
Sg (at 20°C): 1.113
pH: 7 - 7.5

### **Handling and Storage**

Avoid the formation or spread of mists in the air.

Avoid direct contact with the substance.

Store in a cool, well-ventilated area.

Keep container tightly closed.

For full guidance on health and safety
matters, consult the Safety Data Sheet (SDS).

Carry out a 'Control of Substances Hazardous
to Health' (COSHH) assessment before use.

Version: 1

Last updated: 18th July 2017

#### **Test Methods**

Laboratory: Determine concentration and

the level of freeze protection with a

refractometer

Site: As for laboratory

## **Other Helpful Documentation**

Monoethylene Glycol - Freeze protection vs concentration table.
