

Glycol Anti-Freeze

Glycol anti-freeze concentrate with inhibitor

BOSS™ Glycol Anti-Freeze has been formulated for use in the food and beverage industries, specifically for heating and chilled systems where low toxicity is essential. Its best in class formulation offers freeze protection down to -22°C and contains a high-performance inhibitor to protect underfloor heating systems, chillers, boilers and their associated chilling and heating systems.

- Premium Monopropylene Glycol Anti-Freeze agent for chilled and condenser water installations
- Low oral toxicity, food and beverage grade glycol
- Includes BOSS™ Inhibitor protection
- Increases system performance and efficiency
- Nitrate and borate-free
- Low-toxicity Monopropylene Glycol formula
- Protection to -22°C at 40% solution
