

Non-Flush Descaling Agent

Removes & dissolves limescale deposits

BOSS™ Non-Flush De-Scaling Agent has been designed for kettling boilers and other plant room items which are **suffering from heavy limescale deposits** within plate heat exchangers. The amount of limescale within a system will determine the duration of treatment required which could possibly be up to 2 months before noise problems have been completely eliminated.

- High performance heating, chilled and condenser de-scaling agent
- Eliminates boiler noise
- Super concentrate formula
 - Treats system volume at 0.4% dosage rate
- Can remain within the system – no drain after treating
- Removes scale from heat exchangers and other components
- Environmentally friendly, non-toxic, non-acidic formula
